

GENDER PAY GAP REPORT 2017

From 2017 onwards, any UK organisation employing 250 or more employees has to publicly report on its gender pay gap. We are required to report on the mean and median gender pay gap and also a breakdown, by quartiles of the proportion of men and women in each quartile, based on hourly rate.

The gender pay gap is the difference between the average hourly rates of pay between males and females employees regardless of their role in the Service. This is different to equal pay which is the difference, in pay, between men and women undertaking the same roles and being paid the same rate of pay. We are confident that men and women are paid equally for undertaking equivalent roles across the Service, as staff are paid, irrelevant of gender, using nationally agreed pay scales.

Mean and Median Data

Difference between men and women		
	Mean (Average)	Median
Hourly rate	17.57%	16.34%

The table above shows our overall mean (average) and median gender pay gap based on hourly rates of pay as at the 31st March 2017.

Pay Quartiles (based on hourly rates)

The above information illustrates the gender distribution at South Wales Fire and Rescue Service, as at 31st March 2017, as per Gender Pay Gap Reporting requirements.

SOUTH WALES FIRE AND RESCUE SERVICE

GENDER PAY GAP REPORT 2017

The gender pay gap is based on average pay of females and males, so one of the biggest causes of it can be the numbers of women and men in different roles and at different levels in the organisation.

For example: if the majority of employees in the upper pay levels are male and the majority of employees in the lower pay levels are female, there is likely to be a gender pay gap, even though everyone is being paid the correct pay for the roles they are undertaking.

Other reasons which may contribute to a gap include:

- Differing terms and conditions and pay scales for groups of staff across the Service
- A high proportion of women in often lower paid part-time roles
- Pay choices that are made at various points of an individual's working life

There are many possible root causes to these reasons. Some may be personal, such as choices people make because of their own circumstances, their work preferences and their aspirations. Other causes are part of society generally, such as the roles that people have historically been attracted to or feel comfortable working in.

Because there are many contributing factors to a gender pay gap, there isn't one simple solution that fixes it.

As part of our Recruitment and Attraction Strategy, South Wales Fire & Rescue Service actively encourages applications from women, from all backgrounds, across all roles and is also working actively with focus groups to better understand how we break down any perceived barriers to females undertaking uniformed roles in the Service.

Councillor Tudor Davies

Chairman, South Wales Fire and Rescue Authority
