FOI REQUEST			
<p>Incident: VENWOOD CLOSE, WENVOE</p> <p>There is one piece of information which would be very helpful. Someone at the premises whilst the Fire Brigade attended mentioned to me that about 1000 gallons of water would have been used to fight the Fire.</p> <p>Would you kindly check with the Barry Fire station if they would agree with this assessment and if not what volume would they believe may have been used to quell the burning roof?</p>			
FOI RESPONSE			
<p>Information requested not held.</p> <p>SWFRS do not record how much water is used at each incident attended and it would not be appropriate guess or speculate.</p>
