

DATE:	06 March 2018	FOI REQUEST NO:	298_1718
--------------	----------------------	------------------------	-----------------

Under the Freedom of Information Act 2000, Please tell me:

I am applying to you under the Freedom of Information Act 2000 for the following information.

Please could you provide the following details for the financial years 2016/17, 2015/16, 2014/15.

Please could you provide the information separately for each incident, for questions two, three and four.

1) The number of times staff were called out to rescue an animal(s) for each year.

For each incident could you provide the following;

2) The cost of responding to each incident for the Fire Brigade.

3) The animal that was rescued in each incident (e.g. a cat, bird, cow, dog etc).

4) Why the animal had to be rescued in each incident.

The recording system we use splits animals into domestic, wild and livestock but does not have the facility to identify individual types.

The attached spreadsheet splits the animal rescue incidents in South Wales by the following categories:

- Rescues from height
- Rescues from below ground
- Rescues from water / mud etc...
- Lift heavy animal
- Animal harm
- Other

Within each of these categories we split animals into the following types:

- Domestic e.g. Cat, Dog, Rodent, Horse, Bird etc...
- Livestock e.g. Horse, Cow, Sheep, Goat, Pig, Poultry, Fish, Exotic (Llama / Ostrich), Deer etc...
- Wild e.g. Horse, Deer, Wildfowl, Game, Aquatic, Exotics etc...

We do not calculate costs for operational incidents.
