

FIRE SAFETY ADVICE FOR CARE PREMISES

Laundry work is safer during daytime hours.

Ensure **ALL** your appliances undergo regular maintenance and filter cleaning

Consider renewing old appliances if they are becoming problematical.

Dressings, clothing or bedding that come into contact with emollients should be washed at **high temperatures**.

All staff should receive regular fire safety and evacuation training

Carry out meaningful staff fire drills.

Ensure escape routes are kept clear.

Ensure your fire risk assessment is upto date and shared with staff.
